## COMFORT CONTROL AT YOUR FINGER TIPS

**Refreshing Coolness for Sultry Days,  
Heat for Chilly Mornings, Clean,  
Healthful Air at All Times.**

Now...perfect comfort for your home or office, regardless of season or weather.

Airette cools, humidifies, heats, cleans and circulates the air. It is the only portable air conditioner that gives both cooling and heating.

Airette weighs little...you can carry it anywhere. Just plug it into a standard electric socket. No other connection is required.

Airette's richly finished cabinet...measuring 26"x13"x12"...harmonizes with any modern setting. It is available in your choice of metallic gray or metallic brown. The grille is hand polished aluminum.

Airette is completely self-contained, its ample water reservoir holds approximately three gallons. No plumbing connections are necessary, merely add water when required through convenient Water Inlet.

Airette is especially beneficial to hay fever and asthma sufferers.

### OPERATION

A single control knob turns Airette on and switches it instantly to "COLD" or "HEAT." Heat is provided by specially engineered high capacity nichrome electric heating element which quickly brings an average sized room to desired temperature. Cooling is by forced evaporation of water.

A washed air filter pad...made of chemically treated aspin...effectively removes dust, dirt, pollen and foreign material from the air.

Humidity control is provided by a valve conveniently located on the end of the cabinet.

Airette's specially designed fan produces 850 feet velocity per minute, changing the air in an average sized room frequently.

### ECONOMY

When on "COOL" Airette uses only as much current as a 75 Watt light bulb. Heating output is over 5000 BTU.

Airette is designed and engineered for many years of quiet, trouble free operation. It is fully guaranteed.

### FOR SUMMER RELIEF

No more simmering in the heat - Enjoy refreshing, cool, invigorating breezes just like those of an ocean-side or mountain resort...with the mere twist of Airette's finger tip easy to dial switch!

### FOR WINTER WARMTH

With another twist of the switch, the glorious glow of healthful tropical sunshine can be brought right into your home. Airette keeps the average room comfortable on even the frostiest days!

### AND WHAT'S MORE...

Among its "oh, so many" uses, you can't beat Airette for drying the hair, clothes and dainties in a jiffy. Airette cools...humidifies...scientifically filters and circulates the air.
